

easyrail[®] Clinical Shelving System

The single shelf storage system suitable for **all** clinical areas including Clean Rooms

easyrail® Clinical Shelving System

Easy to clean • Simple to fix • Suitable for **all** clinical areas

With no slots, gaps or visible fixing holes, the smooth, simple profile of the Easyrail extrusion renders it especially suitable for the hospital or medical environment.

Finished in epoxy powder coat White RAL9016, it is easy to clean and will support shelves up to 380mm (15") deep.

Composition and Manufacture

Easyrail is manufactured in the UK from aluminium alloy to BS 1139 and BS 1474, with dimensional tolerances to BS EN 755-9. The fixing holes are pre-drilled at 300mm centres and end caps are injection moulded polypropylene.

Sizes and Accessories

Easyrail is available in three lengths: 1000mm, 2000mm and 3000mm. Universal bookend supports are also available. These push fit onto the shelves and can be used on the ends or anywhere along the length.

Performance Guide

Wall material	Max load
Solid brick/masonry	40kg
Lightweight block	20kg
Plasterboard	15kg

Performance

The table can be used as a guide to weight loadings (based on a 1200 x 300 x 18mm shelf with an evenly distributed load). Fixings appropriate to the wall composition must be used.
