

1

Storage of consumables and equipment

HTM71 fitted furniture systems manufactured to the highest standards and with a complete range of accessories to suit almost every product.

To make your choice easier, the cabinets on the following pages show standard configurations of accessories developed with the help of medical staff for specific products. The options are endless and other configurations can be specified simply if preferred.

Full-height, floor mounted cupboards

CEO1 Storage of small/medium consumables

CEO2 Storage of medium/large consumables

CEO3 Storage of large consumables

Tall cabinets providing enormous storage capacity with a proven combination of accessories for almost every product. Different accessory combinations are available to order.

Systeméd cabinets and accessories in Intensive Care Unit Clinical Store Room

CEO6 Storage of endoscopes

Endoscope storage cabinet with a telescopic support platform to keep cleaned scopes dry and safe before next use. Multiple holder profiles are available to suit specific scope designs. Special size scope hanging cabinets can be made to order.

CEO7 Storage of angiographic cardiac catheters

[A] Telescopic Full Frame

[B] Telescopic In-line

[C] Telescopic Hanging

Organise your Catheters exactly how you want them with our choice of telescopic holders. Types B and C can be used with 1000mm wide cabinets if preferred. Tilt-bin cabinets provide a very good storage solution for boxed catheters (see photo opposite).

Tambour door units with hanging catheter storage in private hospital, London

CEO8 Storage of prosthesis implants

CEO9 Storage of sterile dressings

CE10 Storage of sutures

The CE10 cabinet can be adapted to store patient CDs very efficiently.

Popular cabinet combinations for specific products. The CE10 cabinet is available as a double sided unit or single sided with deeper shelves when positioned next to a return wall.

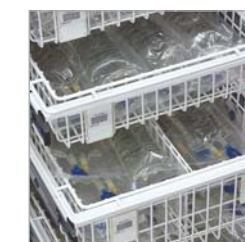

White Corion tops complementing Systeméd cabinets with coloured doors in new Pediatric Theatres

CE11 Storage of small/medium/large consumables

No Clean Utility is complete without a Systeméd CE11 style base cabinet. These provide a practical combination of accessories for efficient storage of large and small items.

CE12 Storage of IV fluids

Very useful base cabinet for areas requiring smaller amounts of decanted fluids or for combining with CE05 units where fluids need to be kept separate from the main stock (eg. fluids that contain potassium).

Systeméd cabinets fitted in new Doctors surgery

Underbench, floor mounted cupboards

CE13 Adjustable shelves

HTM71 Modular Base cabinets with shelves or drawers, ideal for larger or more bulky items. Shelf cabinets can be simply upgraded with support wall or telescopic runners after installation if required.

CE14 Drawers

Drawer base cabinets with metal sides and solid bottoms for strength and long-lasting trouble-free operation. Drawer divider systems available as options.

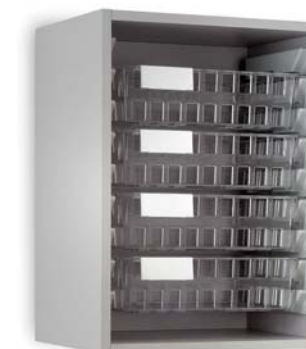

Overbench, wall mounted cupboards

CE15 Adjustable shelves

Swing-glide drawer option

CE16 Storage of small/medium consumables

Standard 455mm wide wall cabinet available in two heights. Help reduce worktop clutter with the Swing-glide drawer option available for the 600mm high unit. CE16 cabinet supplied with half size clear polycarbonate baskets. See section 7 for options and order codes.

CE17 Adjustable shelves

CE18 Storage of small/medium consumables

Standard 655mm wide wall cabinet available in two heights and two depths for larger items or over deeper worktops. CE18 cabinet supplied with full size clear polycarbonate trays. See section 7 for options and order codes.

Hanging rail added to CE20 Bench cabinet for Special Care Baby Unit

Bench height, wall mounted cupboards
