

Setting the standards for
specialist clinical areas

Welcome

Stirling Medical & Scientific Ltd. are passionate about helping you provide the best possible healthcare environment for nursing and healthcare support staff. The photographs on the following pages are all from projects that we have worked on and we hope will help stimulate ideas of what could work well for you too.

Let us help you get it right first time.

Cardiology

Having equipment well organised and in exactly the right place can make the difference between life and death in this important area of the hospital. Systeméd components have been designed with professional help from consultants to make these rooms as efficient as possible.

^ Watford General Hospital

Tall cabinet runs with solid doors providing economical and efficient storage

Basildon Hospital v

HTM71 high density modular storage behind with Systemé aluminium framed glass doors

v Detail

Adjustable shelves for balloon boxes

^ Watford General Hospital

Open fronted cabinets with telescopic large storage baskets for boxed catheter storage

< Basildon Hospital

Tall cabinet run incorporating HTM71 accessories, telescopic catheter holders, large basket for boxed catheters and tall corner unit

Hemel v Hempstead Hospital

Extensive range of accessories available for a multitude of different size stock

^ Detail

Push-on shelf dividers to create variable size pigeon hole slots

Broomfield Hospital >

Tambour door cabinets are a popular choice for catheter labs allowing for full access to stock without door swing restriction

Harefield Hospital >

Frameless glass doors branded with the hospital artwork transfers

> Harefield Hospital

High density mobile catheter hanging units

< Detail

Telescopic 'In-line' catheter holders

Theatre

The hospital theatre is an intense environment with critical life changing procedures taking place almost every day and night.

It is very important that the ancillary rooms: anaesthetic rooms, theatre stores, preparation areas, scrub rooms and recovery are well equipped and designed to assist operating theatre staff with their critical functions.

✓ Private Cancer Centre

Popular theatre cabinet set up with extended worktop providing workstation areas

University Hospital Southampton ^

The theatre environment needs to be easy to clean and bright with good lighting and efficient storage systems for medical stock

< Holly House Hospital

It is often surprising what needs to be stored in a very small space. Efficient storage systems are essential

^ University Hospital Southampton

IPS systems to suit all sink sizes and types

< Northwick Park Hospital

This project combined efficient HTM71 mobile storage cabinets along with fixed bench and wall cabinets. The use of mobile cabinets can suit some procedures allowing the stock to be nearer to the patient bedside if required

< Royal Marsden Hospital

Theatre store with wire shelving bays on mobile base and track system to maximise storage capacity

^ Portsmouth

Theatre changing room with staff lockers, changing cubicles and changing benches

Northwick Park Hospital v

Theatre scrub room with Easyrail clinical shelving system

^ Private Hospital

Trespa compact grade worktops can be shaped to suit operating requirements as shown here below the surgeons panel

University Hospital > Southampton

Systeméd bench mounted smooth tambour door anaesthetic cabinets are the ultimate choice for the modern theatre

Pharmacy

This could be described as the nerve centre of a hospital and needs to be functional and efficient with clear workflows.

Larger hospital improvements to the pharmacy will often include the installation of a robot and planning will be needed to create benching and cabinets to help maximise the benefits available.

< Ealing General Hospital

Tall pigeon hole units creating a final storage island as close as possible to the porter pick up area

> St George's Hospital

Main pharmacy dispensary area showing the main dispensing and checking benches and ward pigeon hole units in the background

^ Wycombe General Hospital

High density Esplan pharmacy units on slide-a-side bases

Broomfield Hospital >

Main dispensary area with bulk storage bays in the background

Southmead Hospital >

Main pharmacy dispensary

< Private Hospital

Out-patients side of dispensing window

Southmead Hospital >

Tall HTM71 island storage units

< Private Hospital

Attractive wood effect hatchway with matching countertop

Wycombe General Hospital >

Island benching with Harley bin cabinet and pigeon hole units to one end

< Royal Marsden

Wall mounted Esplan storage units

< Broomfield Hospital

Shaped benching to suit staff movement patterns

A&E

The A&E area is a very demanding environment where intense use and rapid stock turnaround times are the norm. Robust storage systems are essential and Systeméd cabinets have been developed to withstand the rigours of constant use.

Open fronted cabinets are often chosen for these areas to aid visual access and stock retrieval.

< Acute Hospital

Tall power charging cabinet with power points to the front for easy access

St George's Hospital ^

Resuscitation area showing a variety of storage requirements

Royal Free v

HTM71 tall cabinet storage with worktop for hot desking requirements

< Walk-in Clinic

Examination area with the Systeméd consultant sink base unit featuring a moulded solid surface worktop with waterfall edge detail to contain splashes

A&E Urgent Care Room v

HTM71 cabinets along with IPS system

^ Acute Hospital

Staff base area with tambour door wall cabinets to allow full access when required

< Queen Elizabeth Hospital

Assessment room

Lab

The hospital laboratory areas are often tucked away in a remote location of the hospital with staff working long and hard in often cramped conditions which do not conform to current containment standards.

Systeméd components will greatly assist you in bringing new standards to these areas.

< St George's Hospital

Island unit built around half height stud wall with internal power supply

Parkside Hospital >

Trespa Toplab Plus benching with mobile and fixed base units

Holly House ∨

Intensive working areas

< St George's Hospital

Main pathology laboratory with mobile base cabinets

Holly House >

600mm high wall cabinets over bench mounted equipment

Imaging

Patients are often apprehensive in these areas, especially on the first visit and it is important to make the room as relaxing as possible with careful choice of colours. MRI furniture needs to be non-ferrous because of the magnetic fields involved in the procedures.

< Royal Marsden Hospital, Sutton

Bespoke coil cabinet to suit client requirements

Royal Marsden Hospital Chelsea >

Linac treatment room including wash hand station, laser cupboard and coil cabinet

< Royal Marsden Hospital, Sutton

Coloured wall and base units

^ The Shard, Private Patients

White Systeméd tall cabinets providing efficient and subtle storage

^ Private Hospital

White colour scheme with wide drawer unit for long items

^ Private Hospital

Dark wood effect cabinets provide an interesting contrast to the white colour theme

Outpatients

Consulting rooms should be well equipped, good looking and functional. Achieving the right balance with greatly compliment the consultants task and help the patient relax with confidence.

< Private Hospital

Typical treatment room layout with workstation, cabinets, IPS and treatment couch

Holly House Hospital >

Beverage cabinets in patient waiting area

∨ Harley street

Consulting room with cabinets in wood effect finish to match desking and other room furniture

Royal Marsden ∨

Chemotherapy treatment pod with the Hilton medical supply unit

^ Private Clinic, London

Patient treatment room with IPS unit

^ The Shard, Private Outpatients

Typical treatment room with HTM71 storage units

Patient Bedrooms

Studies have established that a pleasant environment will aid the healing process and patient bedrooms need to be designed with this in mind.

Medical supply units, bedhead areas, patient wardrobes, en-suite facilities are all important and need to be to be good looking yet functional to make the task of nursing the patient back to health quicker.

< Southampton University Hospital

Wood effect carcasses and coloured doors were used in these patient bedrooms. Cabinet set included provision for garment hanging and storage basket with shaped Trespa worktop for mobile fridge unit

Royal Marsden, Private Patients >

Attractive built-in patient wardrobes in wood effect finish alongside standard IPS system

Guy's Cancer Centre >

Patient bedrooms fitted out with full height wardrobes

< Southampton University Hospital

Haematology unit bedroom featuring medical walling system with built in gas and air system, concealed bin and IPS with colour matching cabinetry alongside

< Private Hospital, London

Bespoke medical supply unit bedhead with uplight and decorative glazed panel above

Private Hospital London >

New patient bedroom wardrobe with internal mirror and clothes hanging rail

Admin / Research

Desking needs to be designed to suit the function that the area is going to be used for, taking into account correct working heights and worktop depths and over-bench shelving requirements.

We offer a full range of desking solutions from a simple worktop on support legs to a full desking system with cable management, power solutions and screens.

Royal Marsden Hospital >

Control room featuring Marmoleum inlay worktops with solid wood bullnose fronts and mobile base units

> Private Hospital

Attractive combination of white desking with wood effect cabinetry

> Private Hospital

Central control room area

< St. Mary's Hospital

Easyrail clinical shelving system with no holes or slots making it a favourite choice for Infection control in clinical areas. Worktop supported on chrome legs

Royal Free Hospital >

Wood effect HP laminate worktop supported on cantilever legs and wall shelving supported on spur-type uprights and brackets

> Biomedical Research Unit, Southampton

This project comprised combining a standard desking system along with bespoke-shaped desk tops and cabinetry to allow maximum space utilisation around large fixed circular columns

Ward

The hospital ward is an intense area where clinical help is combined with personal care alongside the challenges of running a 24-hour service with staff rotas and handover routines, to ever changing patient needs and ever changing patient requirements.

Staff need drugs and consumables stored correctly to operate efficiently with minimum stress, and Systeméd HTM71 cabinets are essential.

< Royal Marsden

Systeméd drug cabinets include the option for rear door storage to help reduce the incidence of medicines being left at the back of the shelf and going past use-by dates

✓ QEQM Hospital

Typical clean utility with CD inner cabinet and swing glide drawers for efficient storage

^ Queen Elizabeth Hospital

Ward dirty utility room

QEQM Hospital ✓

Large equipment storage area with hideaway door system

^ St Mary's Hospital

Ward store room with Systeméd tall cabinets to help staff with stock access and organisation

< Private Cancer Centre

Clean utility with Systeméd glass door storage units

^ Lister Hospital

Reduced height mobile tall storage cabinets to allow movement between rooms if required. (Note: mobile tall cabinets are not designed to be used like trolleys)

Hammersmith >
Hospital

Storage units
with built in trolley
parking bay

> Sutton Hospital

Conveniently located staff base area

< Southampton University Hospital

Drug preparation area
with colour-coded staff
working areas

> Southampton University Hospital

Dirty utility room

Royal Marsden >

Staff kitchen

Maternity

Birth areas in hospitals should feel like home: they should be warm and inviting, yet maintain the clinical standards required to help ensure the safe arrival of the new-born child and well-being of the mother. Emergency resuscitation equipment should be nearby and instantly accessible if required.

< Hammersmith Hospital

New birthing rooms with hide-away folding bed and patient wardrobe

Queen Elizabeth Hospital >

Hand wash unit with solid surface sink top and removable panels above for servicing

> Hammersmith Hospital

Resuscitaire housing unit and IPS panel in matching wood effect colour

^ University Hospital Lewisham

New birthing suites with bespoke furniture

Children's

A child's visit to hospital can be a traumatic experience. Providing an interesting environment using bright colours is key in helping children relax, which in turn also helps the hospital staff work efficiently in giving care.

The Systeméd Jump range comprises an assortment of the four primary colours with optional colour co-ordinated handles.

Children's Cancer centre >

Play area with fitted furniture

> Broomfield Hospital

Bespoke theming on desk panelling for children's ward

> Private Children's Hospital

Jump range units with colour recessed handles

> Private Hospital

Children's treatment room

> Children's Cancer Centre

Treatment room including inset sink unit

< Royal Marsden
