

## Design, Storage & Compliance in Clinical Environments

New programme starting from March 2024 – essential for everyone involved in clinical design

“ Premises where care and treatment are delivered are clean, suitable for the intended purpose, maintained and where required, appropriately located, and that the equipment that is used to deliver care and treatment is clean, suitable for the intended purpose, maintained, stored securely and used properly. Providers retain legal responsibility under these regulations. ”

Health & Social Care Act 2008 (CQC)

Design within clinical environments presents Healthcare Project Managers and Planners with many challenges, from understanding storage needs and defining workflow practices to identifying regulatory requirements and managing budgets. With over 20 years leading the way in clinical storage design, development and implementation, we are in a position to share our vision and experience within this very unique sector.

For 2024, we have created a new tailored CPD programme combined with real life size clinical environments in our Design Studio in London to help you get it right first time.

**Kevin Glass, Managing Director**

# Introducing the REVISED 2024 CPD programme

The revised 2024 CPD programme from Stirling Medical & Scientific Ltd is now available and can either be presented face to face in clinical environment surroundings at our Sidcup Design Studio, at your premises, or via Microsoft Teams/Zoom conferencing facilities if preferred.

Looking to discuss a particular project?

We can customise your CPD based on your needs and create a real lifesize clinical space in our Showroom for you to show to your clients.

## CPD programme 2024

HTM63, 71 and HBN03

Clinical storage design issues and case studies

Designing out infection

Materials 3D: the do's, donts and durability

Medicine storage: how the regulations have changed

Q&A

Quotations from NHS Estates and Capital projects teams and Architects

*"Great presentation and material"*

*"Engaging and relevant"*

*"Well delivered information"*

*"Great presentation with detailed information provided"*

Our speakers have experience on projects spanning multiple clinical settings
