

Lockers for the Healthcare Environment

Creating a clean, secure, and efficient environment is essential within healthcare facilities. Staff and visitors alike require dependable personal storage solutions that meet the highest standards of hygiene, functionality, and design.

Our comprehensive range of lockers offers options to suit every situation and budget — from cost-effective steel units to premium compact laminate models. Whether for staff changing rooms, clinical areas, or public spaces, each locker system is engineered for durability, ease of maintenance, and compliance with healthcare standards.

Standard Powder-Coated Steel Lockers

A proven and practical choice, these lockers provide exceptional value and everyday durability. Standard dimensions and features:

- Height:** 1800mm
- Widths:** 300mm or 380mm
- Depth:** 450mm
- Door configurations:** 1, 2, 3, or 4 doors, plus smaller compartment options
- Finish:** Hard-wearing powder coating for easy cleaning and long-term protection
- Door colour options:** Red, Blue, Yellow, Green, White, Black, Silver Grey
- Carcase colour:** Silver Grey

Locking Options

Security and user convenience are key considerations in healthcare environments. A range of locking systems is available to meet different operational requirements:

- Key locks**
Traditional and reliable for individual issue.
 - Hasp and staple locks**
Suitable for personal padlocks, ideal for shared or flexible use.
 - Digital combination cocks**
Modern, keyless operation offering enhanced security and reduced maintenance.
- Each lock type can be configured to match site security policies and access control procedures.

Complementary Products

To create a complete, efficient changing or storage area, a selection of additional products and accessories is available:

- Bench seating and stands**
Enhance comfort and usability in staff changing areas.
- End panels and infills**
Provide a clean, integrated finish to locker runs.
- Shelves, hooks and accessories**
Improve practicality and internal organisation.

Design Features

Every locker is designed to deliver long-lasting performance and hygiene in busy healthcare settings.

- Sloping tops**
Prevent the accumulation of dust and discourage items being placed on top, supporting infection control.
- Ventilated doors**
Allow natural airflow to reduce moisture and odours.
- Durable finishes**
Easy-clean coatings and materials ensure consistent appearance and hygiene.
- Numbering and labelling**
Custom options to aid in organisation and user identification.

Compact Grade Laminate Lockers

Designed for premium installations or high-humidity environments, these lockers combine striking aesthetics with superior performance.

- Available with **Z-shaped doors** for enhanced personal storage in compact spaces
- Offered in a range of **wood-effect or solid colour finishes** for a contemporary appearance

Highly resistant to moisture, impact, and routine cleaning chemicals

Smart Lockers for Pharmacy Applications

Smart lockers provide a secure, convenient, and efficient solution for managing prescription storage and collection. Ideal for hospital pharmacies, outpatient departments, and community healthcare settings, smart lockers deliver flexible, patient-focused dispensing that supports modern healthcare delivery.

Designed to integrate with existing pharmacy systems, they allow patients to collect medications safely and discreetly — even outside standard opening hours — improving service accessibility and reducing pressure on staff.

Out-of-hours collection

Patients can pick up prescriptions at a time that suits them, without pharmacy staff present.

Queue management

Enables patients to leave and return without losing their place in line, improving flow and efficiency.

Enhanced security

Individual compartments accessed by unique codes, QR tokens, or digital authentication for full traceability.

System integration

Links with pharmacy or patient notification systems for real-time collection updates.

Hygienic and durable design

Built to healthcare standards with easy-clean surfaces and secure electronic locks.

From robust powder-coated steel lockers to high-end compact laminate models and advanced smart locker systems, our range offers comprehensive storage solutions tailored to the unique demands of the healthcare environment.

Each product is designed with hygiene, security, and usability in mind — helping to create safe, efficient, and professional spaces for staff, patients, and visitors alike.

Whether you're fitting out a new facility or upgrading existing changing or pharmacy areas, our lockers can be configured to meet your exact needs. With flexible sizing, multiple lock options, and smart technology for automated dispensing and queue management, we provide solutions that support both everyday operations and the evolving needs of modern healthcare delivery.
